The purpose of Pearson BTEC Higher Nationals in Construction Management for England (HTQ) is to develop students as professional, self-reflecting individuals able to meet the demands of employers in the construction sector and adapt to a constantly changing world. The qualifications aim to widen access to higher education and enhance the career prospects of those who undertake them.

The course is One Day a Week (Day TBC, 09:00-19:00)

The Level 4 units lay the foundation of learning by providing a broad introduction to construction and

different construction management functions.
• Construction Technology
• The Construction Environment
• Surveying, Measuring & Setting-out
• Digital Applications for Construction Information
• Site Supervision & Operations
• Legal & Statutory Responsibilities in Construction
• Financial Management & Business Practices in Construction
• Individual Project (Pearson-Set)

**About the course**

The qualifications aim to widen access to higher education and enhance the career prospects of those who undertake them.

The course is One Day a Week (Day TBC, 09:00-19:00)

The Level 4 units lay the foundation of learning by providing a broad introduction to construction and different construction management functions.
• Construction Technology
• The Construction Environment
• Surveying, Measuring & Setting-out
• Digital Applications for Construction Information
• Site Supervision & Operations
• Legal & Statutory Responsibilities in Construction
• Financial Management & Business Practices in Construction
• Individual Project (Pearson-Set)

**Progression and career opportunities**

The Level 4 Higher National Certificate provides a solid grounding in construction, which students can build on should they decide to continue their studies beyond the Certificate stage.
On successful completion of the Level 4 Higher National Certificate, students can develop their careers in the sector through:
• Entering Fulltime employment
• Gaining a Higher Apprenticeship (Site Supervisor/Site Management)
• Continuing existing employment

• Linking with the appropriate professional body
• Committing to Continuing Professional Development (CPD)
• Progressing to university

**Entry requirements**

For students who have recently been in education, the entry requirements are for you to have at least one of the following:

? Level 3 qualification in Construction and Built Environment
? Access to Higher Education Diploma awarded by an approved further education institution
? Related work experience
? An international equivalent of the above.

However, students who are looking to retrain and may not have any of those qualifications above, will be subject to interview. A keen interest within the Construction Industry is essential, and a portfolio of work would be beneficial.

Please note that entry criteria may vary quite significantly between courses at the same level. This is to take account of the specific skills needed for success on particular courses, the length of the course and the requirements for progression to the next level. Entry criteria are given as a guide, and the exact requirements in order to obtain a place on a particular course will be confirmed following attendance at a Welcome Event/Interview.

In addition to the entry qualifications listed, the offer of a place on the course is subject to the outcomes of initial assessment, which will be taken at the College as part of the admissions process. Please note that entry criteria may vary quite significantly between courses at the same level. This is to take account of the specific skills needed for success on particular courses, the length of the course and the requirements for progression to the next level. Entry criteria are given as a guide, and the exact requirements in order to obtain a place on a particular course will be confirmed following attendance at a professional interview.

**Assessment**

We want you to achieve to the very best of your ability at CRC. To make this happen we offer both learning and personal support by specialist staff tailored to meet your specific needs.

Your work will be continually assessed throughout the year with written assignments, presentations, practical experimentation and portfolios of work.
