T-Levels are a 2-year qualification and are an excellent alternative to A Levels, other post-16 courses, or an apprenticeship. They have been designed with leading businesses and employers to give you the knowledge and skills you need to fully understand the role of supporting the adult nursing team.

The course is full-time and takes two years to complete.

All students will develop a general understanding of health and science:

• working within the health and science sector

• health, safety and environmental regulations

• managing information and data
• principles of good scientific and clinical practice
• core science concepts including the structure of cells, tissues and large molecules, genetics, microbiology and immunology

They will also learn about topics specific to health, including:

• understanding the healthcare sector
• providing person-centred care
• supporting health and wellbeing
• further knowledge of both human anatomy and physiology and of diseases and disorders
• infection prevention and control

All students complete a minimum of 315 hours working with an employer on an industry placement Due to the nature of the industry placement all students must hold a clear enhanced Disclosure and Baring Service check and will be supported to complete an application at the start of term.

About the course
This T-level is a technical study programme aimed at preparing young people for work, higher level apprenticeships or higher education. An approved technical qualification which includes the opportunity to specialise in at least one occupational role. Substantial industry placement with an external employer and employability, enrichment and pastoral elements.

Topics covered (Core):
• Working within the health and science sector
• The healthcare sector
• Health, safety and environmental regulations in the health and science sector
• Health and safety regulations applicable in the healthcare sector
• Managing information and data within the health and science sector
• Managing personal information
• Good scientific and clinical practice
• Providing person centred care
• Health and wellbeing
• Infection prevention and control in health specific settings
• Safeguarding

Topics covered (Occupational Specialism –Supporting the Adult Nursing Team):

• Assist the adult nursing team with clinical tasks
• Support individuals to meet activities of daily living.
• Assist with skin integrity assessments and with the care and treatment of skin conditions

Progression and career opportunities

Students who achieve this qualification could progress to the following - Ambulance support worker, Health care support worker or to a higher apprenticeship and higher education to study a health-related degree e.g. Nursing
